

Welcome to this eSpark class on Demystifying and Making Your Own Facial Filters!

Prerequisites:

- You must own an Android device
- Enthusiasm! You do NOT need prior experience in MIT App Inventor, but if you do, that is great! You can learn even more MIT App Inventor skills in this class.

Learning goals:

- Get a better grasp on basic AI concepts
- Make your own facial filter app using App Inventor
- Have fun!!!

What is the agenda?

- Fill out pre-class questionnaire
- Learn some basic MIT App Inventor concepts
- Intro to Artificial Intelligence concepts
- Learn how to apply the power of artificial intelligence to make your own camera app with either a cat or lion facial filter
- Find your own images and design your own facial filter, if time permits
- Fill out post-class questionnaire
